PROFESSIONAL SUMMARY

Software Engineer with **2+ years of experience** in backend development, production debugging, system architecture, and automation. Experienced in owning SaaS systems end-to-end, resolving customer-impacting issues across application and infrastructure layers, and building reliable production workflows.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, C/C++, Python, Java, Go, PHP

Backend/DB: Node.js, NestJS, Express.js, PostgreSQL, MongoDB, MySQL, Redis, REST, GraphQL

Frontend: React, Next.js, ShadCN, Tailwind CSS, MUI, Sass

DevOps/Tools: Docker, CI/CD, Nginx, AWS, Git/GitHub, Linux, Grafana, Loki, Better Stack, Sentry, PostHog

PROFESSIONAL EXPERIENCE

rtCamp | Software Engineer [🔗](#)

07/2024 — Present

- Led engineering and technical development of **Web Auditor**, a production SaaS platform, owning feature development, debugging, infrastructure, and production operations.
- Investigated and resolved complex **production issues** across application, API, data, authentication, payment, and AI workflows, using logs, HTTP requests, application behavior, and local debugging to identify root causes.
- Designed and implemented multi-tenant architecture, access-control mechanisms, subscription and payment workflows, and automated **CI/CD pipelines** covering linting, testing, builds, and deployments.
- Managed production infrastructure on a dedicated Hetzner server, operating Dockerized databases, Redis, Grafana, Loki, and application workloads; configured Nginx and PM2 for service management and production operations.
- Provided **technical support** for Automattic customers for 5 months, troubleshooting server, networking, PHP, WordPress and configuration issues through logs, HTTP requests, and application-level debugging while managing cases through Zendesk.

PROJECTS

FinLink | Financial Management Platform

07/2026 — Present

Technologies: React Native, NestJS, PostgreSQL, Better Auth, Docker, Sentry, Better Stack, PostHog

- Designed a modular financial platform using React Native, NestJS, and PostgreSQL for accounts, holdings, transactions, and ledger data.
- Implemented authentication, authorization, rate limiting, database migrations, security controls, Docker-based development, CI/CD, and automated testing.
- Integrated Better Stack, Sentry, and PostHog for logging, error tracking, and product analytics.

Blockchain Based File Sharing System | VIT ([Live Link](#) | [Code Link](#))

12/2023 — 04/2024

Technologies: Next.js, ShadCN, Prisma, Next-Auth, Nodemailer, IPFS

- Designed and independently implemented a decentralized file-sharing system using **IPFS and Ethereum smart contracts**, covering file upload, chunking, distributed storage, retrieval, and integrity verification.
- Stored file chunks on IPFS while maintaining on-chain metadata and chunk hashes; implemented the retrieval pipeline to reconstruct files and verify chunk integrity.

EDUCATION

Vellore Institute of Technology

Chennai, India

Bachelor of Technology in Computer Science and Engineering | **CGPA: 8.40**

09/2020 — 08/2024
